

IN THE SPECIFICATION

Please amend the specification as follows:

Replace the paragraph on page 12, between lines 3-6 of the specification with the following:

Following step s4.11, communication device F transmits a ~~message 15~~ ~~message 27~~ containing its address list to communication device G (step s4.12) and sets the value of the flag to "1" (step s4.13), before returning to the first mode of operation for latency period t1 (steps s4.1, s4.2 and so on).
